

BEA Union Investment Asia Pacific Flexi Allocation Fund

As at 31 October 2018

- BEA Union Investment Asia Pacific Flexi Allocation Fund (the "Fund") invests in emerging markets and may be subject to higher liquidity and volatility risks.
- The Fund invests directly in REITs, equities, ETFs and managed funds, and is thus subject to the risks generally associated with such asset classes, including but not limited to liquidity of the asset class, changes in investment sentiment, political environment, economic, business and social conditions in the Asia Pacific region.
- The Fund may invest in below investment grade or non-rated debt securities including high yield bonds, which are subject to greater credit and liquidity risks than higher-rated securities.
- The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
- Investors may invest in RMB (Hedged) units. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies of the Chinese government. There is also no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB could adversely affect the value of investors' investments. There is no guarantee that the hedging strategy will be effective and investors may still be subject to the RMB currency exchange risk.
- The Fund may enter into futures contracts for hedging and investment purposes. Given the leverage effect embedded in futures contracts, the Fund may be exposed to significant losses.
- Investors should not make an investment decision based solely on this material.

OBJECTIVE

The Fund seeks to achieve long-term capital growth and income by investing in equity securities or debt securities, that are either traded in the Asia Pacific region or issued by companies incorporated in the Asia Pacific region or companies which have significant operations in or derive significant portion of revenue from the Asia Pacific region.

FUND POSITIONING

- An Asia Pacific equity-biased mixed asset income fund
- Investing in blue-chip stocks to capture upside with a lower volatility strategy
- Investing in bonds and cash to enhance yields and diversify portfolio risks
