

BEA Union Investment Asian Strategic Bond Fund

As at 30 November 2018

- BEA Union Investment Asian Strategic Bond Fund (the "Fund") invests in emerging markets and may be subject to higher liquidity and volatility risks.
- The Fund may invest in below investment grade or non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
- The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
- RMB is currently not freely convertible and is subject to foreign exchange control policies of the Chinese government. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB would adversely affect the value of investor's investment in the Fund.
- The Fund may use derivative instruments for hedging purposes which may not achieve the intended purpose and may result in significant losses.
- Investors should not make an investment decision based solely on this material.
