

BEA Union Investment RMB Core Bond Fund

As at 28 February 2018

Retail Hotline: (852) 3608 0321 | www.bea-union-investment.com

- BEA Union Investment RMB Core Bond Fund (the "Fund") may invest primarily in securities denominated in RMB or have exposure to RMB. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies of the Chinese government. In addition, there can be no assurance that the RMB will not be subject to devaluation. Any devaluation of RMB could adversely affect the value of investors' investments.
- The Fund may invest "Dim Sum" bond. The "Dim Sum" bond market is still a relatively small market which is more susceptible to volatility and illiquidity.
- The Fund may invest in lower-rated fixed income instruments, including below investment grade and non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
- *The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- The Fund may enter into futures contracts for hedging and investment purposes. Given the leverage effect embedded in futures contracts, the Fund may be exposed to significant losses.
- Investors should not make an investment decision based solely on this material.

RATING & AWARDS

Morningstar Overall Rating¹

House Award,
Best-In-Class,
Asia Fixed Income²

1. Source: © 2018 Morningstar. All Rights Reserved. Data as of 28 February 2018. The rating is for A RMB (Dis).
2. Source: Benchmark, November 2017.
3. Since launch till 31 December of the same year.
4. Please refer to the dividend notice available on website for dividend composition information and details. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Annualised dividend yield = (dividend of the current month x 12) / last month end NAV x 100%. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

Performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested. HKD/USD based investors are exposed to foreign exchange fluctuations.
