

## Important note:

1. BEA Union Investment Asian Bond and Currency Fund (the "Fund") seeks regular interest income, capital gains and currency appreciation from an actively managed portfolio of debt securities denominated in Asian or other currencies and primarily issued by Asian government or corporate entities.
2. The Fund invests in emerging markets, which are subject to higher liquidity and volatility risks.
3. The Fund may invest in lower-rated fixed income instruments, including below investment grade and non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
4. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
5. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
6. Investors may invest in RMB (Hedged) units. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies of the Chinese government. There is also no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB could adversely affect the value of investors' investments. There is no guarantee that the hedging strategy will be effective and investors may still be subject to the RMB currency exchange risk.
7. The Fund may enter into futures contracts and currency forward contracts for hedging and investment purposes. Given the leverage effect embedded in futures and currency forward contracts, the Fund may be exposed to significant losses.
8. Investors should not make an investment decision based solely on this material.

## BEA Union Investment Asian Bond and Currency Fund ("ABC")

★★★★★  
Morningstar Overall Rating<sup>1</sup>

### Prefer Short-dated Chinese High Yield Property Bonds

#### Highlights:

1. Short-dated Chinese high yield property bonds show attractive valuations
2. Indonesian property bonds outperformed due to improved market sentiment
3. High-quality investment grade bonds were added for defensive purpose

#### Fund Features

- The Fund adopts unconstrained strategy, with maximum flexibility allowed in allocating assets among corporate bonds, government bonds, high yield bonds and investment grade bonds, actively hunting for alpha opportunities.
- Seeks stable dividends and exploits appreciation potential of Asian bonds.

#### Market Review and Outlook

##### Review of Interest Rate Market

- 10-year U.S. Treasury yields had widened by 20 basis points to 3.06% by the end of September. This was driven by improved risk sentiment as the market digested headlines about the trade war and strong economic data in the U.S.
- The recent Federal Open Market Committee meeting statement indicated that the Federal Reserve will keep raising interest rates gradually as economic momentum grows.

##### Asian High Yield Bonds

- Asian high yield bond markets showed some recovery in September, Indonesian property bonds outperformed due to risk-on market sentiment and a more stable rupiah.
- Chinese high yield industrial bonds also recovered following a resumption of onshore bond issuance and positive corporate event on individual names.

### Market Outlook

- We remain cautiously positive on the Asian bond market amid trade war concerns, volatility in emerging market currencies, and China's evolving funding environment. At the same time, we also see market valuations becoming attractive, creating opportunities to add high-quality credits.

### Investment Strategy

- The Fund maintained a fairly conservative strategy in September and switched from some high yield positions into the investment grade sector.
- In terms of high yield bonds, the Fund continues to trim exposures in weaker names while we prefer short-dated Chinese property for their attractive valuations and solid fundamentals.
- In terms of investment grade bonds, the Fund lengthened its duration and used some of its cash reserves to add more high-quality credit for defensive purpose.

### Fund Performance and Dividend

Performance<sup>2</sup> : A USD (Distributing)

Dividend

September 2018	Dividend per Unit	Annualised Dividend Yield <sup>3</sup>

Source of the fund data: BEA Union Investment Management Limited, as at 28 September 2018.

- ©2018 Morningstar. All Rights Reserved. Data as of 28 September 2018. The rating is for A USD (Distributing).
- Source: Lipper, as at 28 September 2018. The quoted return is for A USD (Distributing) launched on 28 August 2008. Performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested.
- Annualised dividend yield = (dividend of September x 12) / last month end NAV x 100%. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Such distribution may result in an immediate reduction of the net asset value per unit. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained above. You should read the relevant offering document (including the key facts statement) of the Fund for further details including the risk factors.
