

Important note:

1. BEA Union Investment Asian Strategic Bond Fund (the "Fund") seeks medium to long term capital growth and regular income by primarily (i.e. at least 70% of its non-cash assets) investing in debt securities that are (a) denominated in Asian currencies, or (b) issued or guaranteed by Asian governments or entities which are incorporated in Asia or have significant operations or assets in, or derive significant portion of revenue or profits from Asia, and denominated in USD or other currencies including Asian currencies.
2. The Fund invests in emerging markets and may be subject to higher liquidity and volatility risks.
3. The Fund may invest in below investment grade or non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
4. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
5. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
6. RMB is currently not freely convertible and is subject to foreign exchange control policies of the Chinese government. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB would adversely affect the value of investor's investment in the Fund.
7. The Fund may use derivative instruments for hedging purposes which may not achieve the intended purpose and may result in significant losses.
8. Investors should not make an investment decision based solely on this material.

BEA Union Investment Asian Strategic Bond Fund

Asian Investment Grade Bonds Supported by Accommodative Interest Rate Environment

Highlights:

1. Gradual rate hikes ensure accommodative interest rate environment
2. Indonesian and Indian high yield bonds boosted by commodity price recovery
3. The Fund has risen 4.2%¹ since its launch

Fund Features

- The Fund adopts flexible allocation in Asian investment grade / high yield bonds, diversifying into different Asian countries, sectors, and currencies.
- The Fund invests not more than 50% in Asian high yield bonds in general conditions.
- Mainly invests in corporate bonds which tend to be less sensitive to rate hike cycle.

Market Review and Outlook

Review of Interest Rate Market

- The U.S. Federal Reserve raised the interest rate by 0.25% in December, in line with market expectation. Last year's 3 rate hikes have been fully absorbed by the market, yet the Asian bond market continues to perform well overall due to strong liquidity and the improving fundamentals of corporates.

Asian Investment Grade Bonds

- Long-dated Southeast Asian sovereigns, quasi-sovereigns, and state-owned oil companies outperformed in 2017. This was mainly driven by the accommodative interest rate environment, compressed yield spreads, and the strong recovery in commodity prices.

Asian High Yield Bonds

- Indonesia and India high yield bonds outperformed because of lower bond issuance supply and scarcity value, as well as the strong recovery of commodity prices.

Investment Strategy

- Although the U.S. and Europe continue to see economic improvement, the pace of rate hikes will most likely be gradual. This accommodative interest rate environment will continue to support Asian investment grade bonds.
- The positive factors supporting Asian bonds are expected to persist in 2018, including consistent investment flows, high yield bonds' low correlation with interest rates, and improving corporate credit.
- In terms of investment grade and high yield bonds, the Fund continues to trim its exposure in higher beta bonds while switching into more defensive bonds.

Fund Performance and Dividend

Performance¹ : A USD (Distributing)

* A USD (Distributing) launched on 24 February 2017.

Dividend

December 2017	Dividend per Unit	Annualised Dividend Yield ²
A USD (Distributing)	US\$ 0.03750	4.5%
A HKD (Distributing)	HK\$ 0.37500	4.4%
A AUD Hedged (Distributing)	AU\$ 0.04500	5.4%
A RMB Hedged (Distributing)	RMB 0.54000	6.4%

Throughout most of the time since launch, 100% of the Fund's dividends came from net distributable income.

Source of the fund data: BEA Union Investment Management Limited, as at 31 December 2017.

1. Source: Lipper, as at 31 December 2017. The quoted NAV is for A USD (Distributing) launched on 24 February 2017, performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested.
2. Annualised dividend yield = (dividend of December x 12) / last month end NAV x 100%. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Such distribution may result in an immediate reduction of the net asset value per unit. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained above. You should read the relevant offering document (including the key facts statement) of the Fund for further details including the risk factors.
