

## Important note:

1. BEA Union Investment China High Yield Income Fund (the "Fund") seeks to achieve medium to long term capital growth and regular income by primarily investing in high yield debt securities that are issued or guaranteed by entities which are incorporated in China or have significant operations in or assets in, or derive significant portion of revenue or profits from China.
2. The Fund may invest significantly in below investment grade or non-rated debt securities, including high yield bonds, which are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than higher rated securities.
3. The Fund's investments are concentrated in China. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
4. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
5. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
6. RMB is currently not freely convertible and is subject to foreign exchange control policies of the Chinese government. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB would adversely affect the value of investor's investment in the Fund.
7. The Fund may use certain financial derivative instruments for hedging and investment purposes, which may not achieve the intended purpose and may result in significant losses.
8. Investors should not make an investment decision based solely on this material.

## BEA Union Investment China High Yield Income Fund

### Continued Caution on Higher Beta Chinese High Yield Industrial Bonds

#### Highlights:

1. Reason to remain cautiously positive about Chinese high yield bond market in light of attractive carry and strong balance sheets
2. Chinese high yield property bonds show resilience during market correction due to better credit profiles
3. The Fund has achieved 1.6%<sup>1</sup> growth in 1 year

#### Fund Features

- The Fund diversifies over 80 China high yield bonds.
- Selects quality China high yield bonds to target stable income and additional return.

#### Market Review and Outlook

##### Review of Interest Rate Market

- U.S. Treasuries have rallied in May as the global risk-off sentiment increases due to concerns about Italian politics and emerging market currency weakness. Despite the recent volatility, we expect the U.S. Federal Reserve to continue its rate normalisation.

##### Chinese High Yield Bonds

- There was a single default case in the U.S. dollar denominated Chinese high yield bond market and several headlines about Chinese non-property companies, causing a sharp re-pricing in May.
- The stress in the Chinese onshore credit market and irregular price movements are affecting mark-to-market bond prices in the Chinese offshore market.
- Chinese high yield property sector has been relatively resilient during the correction process due to its better credit profile, while Chinese high yield industrials have underperformed due to some credit events.

**Investment Strategy**

- We are cautiously positive to the overall about Chinese high yield bonds, given their attractive carry and issuers' strong balance sheets.
- In view of recent headlines, the Fund has continued to reduce its holdings in some higher beta names - especially in the Chinese industrial sector and has retained a higher level of cash.

**Fund Performance and Dividend**

 Performance<sup>1</sup> : A USD (Distributing)

Dividend

May 2018	Dividend per Unit	Annualised Dividend Yield <sup>2</sup>
A USD (Distributing)	US\$ 0.05770	6.8%

Source of the fund data: BEA Union Investment Management Limited, as at 31 May 2018.

- Source: Lipper, as at 31 May 2018. The quoted NAV is for A USD (Distributing) launched on 22 April 2016, performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested.
- Annualised dividend yield = (dividend of May x 12) / last month end NAV x 100%. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Such distribution may result in an immediate reduction of the net asset value per unit. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained above. You should read the relevant offering document (including the key facts statement) of the Fund for further details including the risk factors.
