

Important note:

1. BEA Union Investment China High Yield Income Fund (the "Fund") seeks to achieve medium to long term capital growth and regular income by primarily investing in high yield debt securities that are issued or guaranteed by entities which are incorporated in China or have significant operations in or assets in, or derive significant portion of revenue or profits from China.
2. The Fund may invest significantly in below investment grade or non-rated debt securities, including high yield bonds, which are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than higher rated securities.
3. The Fund's investments are concentrated in China. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
4. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
5. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
6. RMB is currently not freely convertible and is subject to foreign exchange control policies of the Chinese government. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of RMB would adversely affect the value of investor's investment in the Fund.
7. The Fund may use certain financial derivative instruments for hedging and investment purposes, which may not achieve the intended purpose and may result in significant losses.
8. Investors should not make an investment decision based solely on this material.

BEA Union Investment **China High Yield Income Fund ("CHY")**

Looking to Add Chinese Property Bonds with Decent Valuations

Highlights:

1. **The Fund looks for opportunities to add Chinese high yield property bonds with decent valuations**
2. **Attractive new issue premiums in Chinese high yield segments**
3. **We remain cautious on privately-owned Chinese industrial names**

Fund Features

- The Fund diversifies over 50 China high yield bonds.
- Selects quality China high yield bonds to target stable income and additional return.

Market Review and Outlook
Review of Interest Rate Market

- The U.S. Federal Reserve reinforced a more dovish stance at a meeting of the Federal Open Market Committee in December 2018 and lowered the rate hike expectation for 2019. U.S. Treasury yields dropped as a result.

Chinese High Yield Bonds

- Chinese high yield property bonds continue to outperform as yields tightened for the B and BB-rated names. Chinese industrial bond yields rose further due to headline news and concerns about refinancing.
- We see attractive valuations across some higher-quality names after the market correction of the past few months. We are cautiously optimistic about emerging market currencies as a result of the lower rate hike expectations in the U.S.
- However, the course of trade talks between China and the U.S. is still a risk factor that may create market volatility. We still see a higher risk in privately-owned Chinese industrial names which have relatively tight onshore funding.

Investment Strategy

- The Fund continues to look for opportunities to invest in higher yielding names with decent valuations and better credit quality, such as Chinese property bonds.
- The Fund has been picking up bonds in the primary market, as we are seeing attractive new issue premiums in Chinese high yield segments.
- We are cautiously optimistic on emerging market currencies and looking for opportunities to add to our position in Asian local currency bonds.

Fund Performance and Dividend
Performance¹ : A USD (Distributing)

Dividend

December 2018	Dividend per Unit	Annualised Dividend Yield ²
A USD (Distributing)	US\$ 0.05990	7.5%

Source of the fund data: BEA Union Investment Management Limited, as at 31 December 2018.

- Source: Lipper, as at 31 December 2018. The quoted NAV is for A USD (Distributing) launched on 22 April 2016, performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested.
- Annualised dividend yield = (dividend of December x 12) / last month end NAV x 100%. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Such distribution may result in an immediate reduction of the net asset value per unit. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained above. You should read the relevant offering document (including the key facts statement) of the Fund for further details including the risk factors.
