

Important note:

1. BEA Union Investment China Gateway Fund (the “Fund”) seeks medium to long term capital growth and income through investing primarily in equity securities and/or debt securities, that are either (a) traded in China or (b) issued by entities incorporated in China or entities which have significant operations in or assets in, or derive significant portion of revenue or profits from China.
2. The Fund’s investments are concentrated in China’s equity securities and debt securities. This may result in greater volatility than a fund having a more diverse portfolio of investments. The Fund may also be subject to withholding and other taxes imposed in China.
3. The Fund may invest in below investment grade, or rated BB+ or below by a China credit rating agency, or non-rated debt securities, which are subject to greater interest rate, credit and liquidity risks, higher volatility and greater risk of loss of principal and interest than higher-rated debt securities.
4. The Fund may invest in China A-Shares via Stock Connects, China interbank bond market via Foreign Direct Access Regime and/or Bond Connect. Such programmes are subject to regulatory risks and various risks such as quota limitation, volatility risk, liquidity risk, settlement and counterparty risk etc.
5. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Distributions paid out of capital amount to a return or withdrawal of part of the unitholder’s original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per unit.
6. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
7. RMB is currently not freely convertible and is subject to exchange controls and restrictions. Any depreciation of RMB could adversely affect the value of investor’s investment in the Fund.
8. The Fund may use derivative instruments for hedging purposes which may not achieve the intended purpose, and may result in significant losses.
9. Investors should not make an investment decision based solely on this material.

BEA Union Investment China Gateway Fund (“CGF”)

Reduce Exposure on Trade Vulnerable Sectors

**Highlights:**

1. The G20 Summit is closely watched by investors
2. The Fund has reduced its exposure on trade vulnerable sectors
3. The Fund added Hong Kong property stocks as rate cut probability jumped

Fund Features

- A one-stop solution for investing in Chinese stocks and bonds. Access to onshore and offshore investment channels, providing a way to fully capture investment opportunities in Chinese stocks and bonds.
- Flexible allocation in stocks and bonds to balance risk and return.

Market Review and OutlookEquities

- China’s onshore and offshore equity markets reversed its upward trend and plunged sharply in May. It was mainly driven by the re-escalation of trade tensions, weaker than expected economic data in China and renminbi depreciation.
- The G20 Summit to be held near the end of June is closely watched by investors. The outcome of trade negotiation between the U.S. and China may prompt risk-on or further risk-off sentiment.
- We expect investor sentiment will remain cautious in the near term, market preference may shift towards defensive, domestically oriented and companies with better earning visibility.

Bonds

- In May, the overall high yield bond market weakened. Chinese high yield financial and Chinese high yield property sectors outperformed with a positive total return. The yield spread for Chinese high yield financial sector slightly tightened.
- Chinese high yield industrial bonds recorded a negative total return in May as the sector was dragged by few names with negative headlines.

Investment Strategy

Equities

- The Fund has reduced its exposure on high beta sectors which are vulnerable to the U.S.-China trade tension. It has added defensive sectors such as consumer staples, telecom and utility. At the same time, the Fund has raised cash holdings in May.
- In addition, the Fund added Hong Kong property stocks as market is expecting a higher probability of rate cut in the U.S.

Bonds

- The Fund continues to remain defensive and maintain a moderately low level of high beta and long duration names in view of the uncertain macro economy, trade talk risk and tightening property policy in China.
- At the same time, the Fund continues to look for opportunities to pick up defensive investment grade bonds with higher credit quality.

Fund Performance and Dividend

Performance¹ : A USD (Distributing)

Dividend

May 2019	Dividend per Unit	Annualised Dividend Yield ²
A USD (Distributing)	US\$ 0.033	4.6%

Source of the fund data: BEA Union Investment Management Limited, as at 31 May 2019.

1. Source: Lipper, as at 31 May 2019. The quoted NAV is for A USD (Distributing) launched on 31 January 2018, performance is calculated in the respective class of denominated currencies on a NAV to NAV basis. Gross income is re-invested.
2. Annualised dividend yield = (dividend of May x 12) / last month end NAV x 100%. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Such distribution may result in an immediate reduction of the net asset value per unit. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained above. You should read the relevant offering document (including the key facts statement) of the Fund for further details including the risk factors.

Investments in the Fund are subject to investment risks, including the possible loss of the principal amount invested. For full details and risk factors of the Fund, please refer to the explanatory memorandum of the Fund. Investors should also read the explanatory memorandum of the Fund for detailed information prior to any subscription. The information contained herein is only a brief introduction to the Fund. Investors should be aware that the price of units may go down as well as up as the investments of the Fund are subject to market fluctuations and to the risks inherent in all investments. Past performance is not indicative of future performance.
